Note 1 : Corporate Information

Ashoka Kharar Ludhiana Road Limited ("AKLRL", "the Company") is a public company domiciled in India and incorporated on August 23, 2016 under the provisions of the Companies Act, 2013. Its shares are not listed on any stock exchanges in India. The Company is engaged in the business of designing, building, financing, operation and maintenance of 4/6 laning of Kharar to Ludhiana section of National Highway No 5 in the state of Punjab on Hybrid Annuity mode Basis (HAM). The company caters to Indian market only.

AKLRL is wholly owned subsidiary of Ashoka Concessions Ltd (ACL).

The registered office of the company is located at Unit No.675, Tower-B, Vegas Mall, Sector-14, Dwarka, New Delhi 110 075.

Note 1.1: Basis of preparation

The Company's financial statements ('financial statements') have been prepared in accordance with the provisions of the Companies Act, 2013 and the Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 read with Section 133 of the Companies Act, 2013 (as amended from time to time). During the year, the Company has adopted amendments to the said Schedule III. The application of these amendments do not impact recognition and measurement in financial statements. However, it has resulted in additional disclosures which are given under various notes in the financial statements.

The financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities (refer accounting policy regarding financial instruments) which have been measured at fair value.

The standalone financial statements are presented in INR which is also Companies Functional Currency and all values are rounded to the nearest lakhs Rupees, except otherwise indicated.

Note 1.1.1: Material Accounting Policy Information

The financial statements (except for Statement of Cash Flow) are prepared and presented in the format prescribed in Division II – Ind AS Schedule III ("Schedule III") to the Companies Act, 2013. The Statement of Cash Flow has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash flows". Amounts in the financial statements are presented in Indian Rupees in Lakhs as per the requirements of Schedule III. "Per share" data is presented in Indian Rupees upto two decimals places.

1.01 Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current assets.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current Liabilities.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle for the purpose of current / non current classification of assets and liabilities.

1.02 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2- Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 -Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Company's Management determines the policies and procedures for both recurring fair value measurement, such as derivative instruments and unquoted financial assets measured at fair value, and for non-recurring measurement, such as assets held for distribution in discontinued operations.

At each reporting date, the Management analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the Company's accounting policies. For this analysis, the Management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.

The management also compares the change in the fair value of each asset and liability with relevant external sources to determine whether the change is reasonable.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

Disclosures for valuation methods, significant estimates and assumptions (Refer Note 1.18)

Financial instruments (including those carried at amortised cost) (Refer Note 31)

1.03 Revenue Recognition

Revenue Recognition Service Concession Arrangements

Company recognises revenue in line with the Appendix C to Ind AS 115 – Service Concession Arrangements under financial asset model. Under this model, the Company recognises a financial assets, attracting interest, in its balance sheet, in consideration for the services it provides. Such financial assets are recognised in the balance sheet under Financial Assets, in an amount corresponding to the fair value of the infrastructure on first recognition and subsequently at amortised cost. The receivables is settled by means of the grantor's payment received. The income calculated on the basis of the effective interest rate is recognised under other operating income.

Revenue from contract with customer

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

The Company constructs or upgrades infrastructure (construction or upgrade services) used to provide a public service and operates and maintains that infrastructure (operation services) for a specified period of time. These arrangements may include infrastructure used in a public-to-private service concession arrangement for its entire useful life.

The Company is required to carry out operations and maintenance on the road annually with an obligation to carry out periodic maintenance in terms of the Concession at regular intervals. The Company will get fixed amount of Operation and Maintainance receipts as per the terms of the Concession.

Utility Shifiting Income is recognised as and when the work is completed and the same is certified by the National Highway Authority of India ('NHAI').

1.04 Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

Contract assets represent revenue recognized in excess of amounts billed and include unbilled receivables. Unbilled receivables, which represent an unconditional right to payment subject only to the passage of time, are reclassified to accounts receivable when they are billed under the terms of the contract.

1.05 Receivable under Service Concession Arrangements

The Company constructs or upgrades infrastructure (construction or upgrade services) used to provide a public service and operates and maintains that infrastructure (operation services) for a specified period of time. These arrangements may include infrastructure used in a public-to-private service concession arrangement for its entire useful life.

The Company recognises the considerations given by the grantor i.e. National Highway Authority of India ('NHAI') in accordance with Appendix C-'Service Concession Arrangements' of Ind AS 115- 'Revenue from Contracts with Customers'. The Company recognises a financial asset to the extent that it has an unconditional contractual right to receive cash. As per Service Concession Arrangement the financial assets needs to be recognised in accordance with Ind AS 109. Ind AS 109 requires a financial asset to be measured at its fair value and any difference between the initial measurement of the financial asset in accordance with Ind AS 109 and the contract asset recognised under Ind AS 115 to be presented as an expense.

1.06 Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made, or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

Amounts received before the related work is performed are disclosed in the balance sheet as contract liability and termed as advances received from customers.

1.07 Property, Plant and Equipments

The initial cost of property, plant and equipment comprises its purchase price, including non-refundable purchase taxes, and any directly attributable costs of bringing an asset to working condition and location for its intended use. If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Property, Plant and Equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Cost comprises of purchase price inclusive of taxes, commissioning expenses, etc. upto the date the asset is ready for its intended use.

Significant spares which have a usage period in excess of one year are also considered as part of Property, Plant and Equipment and are depreciated over their useful life.

Borrowing costs on Property, Plant and Equipments are capitalised when the relevant recognition criteria specified in Ind AS 23 Borrowing Costs is met.

Decomissioning costs, if any, on Property, Plant and Equipment are estimated at their present value and capitalised as part of such assets.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values and useful lives of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Leasehold improvements is amortized on a straight line basis over the period of lease.

NSHOKA

1.08 Depreciation on tangible assets

Depreciation on fixed assets is calculated on a written down value method using the rates arrived at based on the useful lives prescribed under the Schedule II to the Companies Act, 2013.

1.09 Taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax as sets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

The Company is subject to income tax in India on the basis of standalone financial statements. As per the Income Tax Act, the Company is liable to pay income tax which is the higher of regular income tax payable or the amount payable based on the provisions applicable for Minimum Alternate Tax (MAT).

MAT paid in excess of regular income tax during a year can be carried forward for a period of 15 years and can be offset against future tax liabilities.

Business loss can be carried forward for a maximum period of eight assessment years immediately succeeding the assessment year to which the loss pertains. Unabsorbed depreciation can be carried forward for an indefinite period.

1.10 Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognise a contingent liability but discloses its existence in the financial statements.

1.11 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

1.12 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

1.13 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial Assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories;

Debt instruments at amortised cost

Debt instruments at fair value through other comprehensive income (FVTOCI)

Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)

Equity instruments measured at fair value through other comprehensive income (FVTOCI)

Debt instruments at amortised cost

A financial assets is measured at the amortised cost if both the following conditions are met:

- a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- b) contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. All the Loans and other receivables under financial assets (except Investments) are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Trade receivables do not carry any interest and are stated at their nominal value.

After initial measurement such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has designated certain debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument by- instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a company of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

The rights to receive cash flows from the asset have expired, or

The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material lay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the company could be required to repay.

Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- a. Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance.
- b. Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18

The company follows 'simplified approach' for recognition of impairment loss allowance on:

- Trade receivables and
- Other financial assets

Trade receivable:

The company Management has evaluated the impairment provision requirement under IND As 109 and has listed down below major facts for trade and other receivables impairment provisioning:

Also the receivable from Company companies are considered to be good and there are neither been any past instances of default and also management doesn't expect any default in case of Company receivables.

Other Financial Assets:

Other Financial Assets mainly consists of Unbilled revenue measured at amortised cost.

Following are the policy for specific financial assets:-

Type of financial asset	
Prepaid expenses	Prepaid expenses include upfront fees paid by the Company for sanction of term
	loan which shall be adjusted against the subsequent disbursement of loan to the
	Company.

CIN: U45309DL2016PLC304822

Notes to Financial Statements as at and for the year ended 31st March, 2024

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, trade payables and other payables.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts and other

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities designated upon initial recognition as at fair value through profit or loss.

Loans and borrowings

This is the category most relevant to the Company. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. However, the company has borrowings at floating rates. Considering that the impact of restatement of effective interest rate, year on year due to reset of interest rate, is not material and hence the company is amortising the transaction cost in straight line basis over the tenure of the loan. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the transaction cost amortisation process.

This category generally applies to borrowings.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

1.14 Earning per share

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the year. Diluted EPS is determined by adjusting the profit or loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential equity shares.

1.15 Segment information

The Company is engaged in "Road Infrastructure Projects" which in the context of Ind AS 108 "Operating Segment" is considered as the only segment. The Company's activities are restricted within India and hence no separate geographical segment disclosure is considered necessary.

1.16 Leases

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

1.17 Financial liabilities and Equity

Classification as debt or equity

Debt and equity instruments issued by a Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual agreements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidence a residual interest in the assets of an equity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct costs.

1.18 Significant accounting judgement, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future years.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods. Detailed information about each of these estimates and judgements is included in relevant notes together with information about the basis of calculation for each affected line item in the financial statements. Please refer note 1.03, 1.04 and 1.05 of the accounting policies for the estimates and underlying assumptions.

Estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

Notes to Financial Statements as at and for the year ended 31st March, 2024

(All figures are Rupess in lakh unless otherwise stated)

Basic EPS amounts are calculated by dividing the profit for year attributable to equity holders by the weighted average number of Equity shares outstanding during the year.

Diluted EPS amounts are calculated by dividing the profit attributable to equity holders by the weighted average number of Equity shares outstanding during the period plus the weighted average number of Equity shares that would be issued on conversion of all the dilutive potential Equity shares into Equity shares.

The following reflects the income and share data used in the basic and diluted EPS computations:

(₹ In Lakhs)

	March 31,	March 31,
	2024	2023
Profit/(Loss) attributable to equity holders of the parent for basic earnings	5,491.78	3,583.17
Weighted average number of Equity shares for basic and diluted EPS*	7,50,00,000	7,50,00,000
Face value per share	10.00	10.00
Basic and Diluted earning per share	7.32	4.78

Note:Since there are no potential dilutive instruments, Diluted EPS is considered equal to EPS

* There have been no other transactions involving Equity shares or potential equity shares between the reporting date and the date of authorisation of these financial statements.

Note 29 : Details of dues to micro and small enterprises as per MSMED Act, 2006

There are no Micro and Small Enterprises as defined in the Micro and Small Enterprises Development Act, 2006 to whom the company owes dues on account of principal amount together with interest and accordingly no additional disclosures have been made. The above information regarding Micro and Small Enterprises has been determined to the extent such parties has been identified on the basis of information available

Particulars	March 31, 2024Marc	h 31, 2023
(a) Principal amount remaining unpaid (but within due date as per the MSMED Act)	-	-
(b)Interest due thereon remaining unpaid	-	-
(c)Interest paid by the Company in terms of Section 16 of the Micro, Small and Medium Enterprises Development Act, 2006, along-with the amount of the payment made to the supplier beyond the appointed day during the period		-
(d)Interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the period) but without adding interest specified under the Micro, Small and Medium Enterprises Act, 2006	-	-
(e)Interest accrued and remaining unpaid	-	-
(f)Interest remaining due and payable even in the succeeding years, until such date when the interest dues as above are actually paid to the small enterprises	-	-

Note 30 : Financial Instruments - Fair Values And Risk Management

The carrying values of financials instruments of the Company are as follows-

(₹ In Lakhs)

		March 3	1, 2024	March 31, 2023	
Particulars	Note Reference	Carrying Value	Fair Value	Carrying Value	Fair Value
Financial assets					
Receivable under service concession arrangements	3 & 9	42,260.94	42,260.94	50,179.36	50,179.36
Trade receivables	6	256.31	256.31	9,381.47	9,381.47
Cash and cash equivalent	7	15,939.07	15,939.07	350.48	350.48
Other Financial Asset	4 & 8	10,304.73	10,304.73	8,515.37	8,515.37
		68,761.05	68,761.05	68,426.68	68,426.68
Financial liabilities					
Borrowings	14 & 15	39,179.37	39,312.48	43,406.00	43,569.79
Trade payable	16	49.23	49.23	2,389.98	2,389.98
Other Financial Liabilities	17	278.47	278.47	312.74	312.74
		39,507.07	39,640.18	46,108.72	46,272.51

The management assessed that cash and cash equivalents, trade receivables, trade payables and other current liabilities approximate their carrying amounts largely due to the short term maturities of these instruments.

Note 31 : Fair Value Hierarchy

All financial instruments for which fair value is recognised or disclosed are categorised within the fair value hierarchy described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.

Level 1: Quoted (unadjusted) price is active market for identical assets or liabilities

Level 2: Valuation technique for which the lowest level input that has a significant effect on the fair value measurement are observed, either directly or indirectly

Level 3: Valuation technique for which the lowest level input has a significant effect on the fair value measurement is not based on observable market data

Recognised and measure at fair value

There is no outstanding financial instrument as on March 31, 2024 which are measured at fair value.

Credit risk on Financial Assets

The company engaged in infrastructure development and construction business on Hybrid Annuity mode Basis (HAM) and currently derive the turnover from EPC contracts with NHAI. Payments are typically not secured by any form of credit support such as letters of credit, performance guarantees or escrow arrangements. Credit risk is the risk that counterparty will not meet its obligations under a financial instrument, leading to a financial loss. The Company is exposed to credit risk from its operating activities and from its financing activities, including deposits with banks, and other financial instruments.

Financial assets that are potentially subject to concentrations of credit risk and failures by counter-parties to discharge their obligations in full or in a timely manner consist principally of cash, cash equivalents and trade and other receivables. Credit risk on cash balances with Bank are limited because the counterparties are entities with acceptable credit ratings. The exposure to credit risk for trade receivable is low as its mainly consist of NHAI and amount is received on timely basis within the credit period.

Ageing analysis of the age of trade receivable amounts that are past due as at the end of reporting year but not impaired:

		(* In Lakns)
Particulars		March 31,
raiticulais	2024	2023
Less than 90 days	252.10	8,723.21
Over 90 days	4.21	658.26

Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Company top management in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the top management on an annual basis, and may be updated throughout the year subject to approval of the Company's board of directors. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Company's objective is to, at all times maintain optimum levels of liquidity to meet its cash and collateral requirements. The Company closely monitors its liquidity position and deploys a robust cash management system. It maintains adequate sources of financing including debt and overdraft from banks at an optimised cost.

The Company's maximum exposure relating to financial guarantees and financial instruments and the liquidity table below:

· · · · · · · · · · · · · · · · · · ·	· · · · · · · · · · · · · · · ·					(₹ In Lakhs)

	46,108.72	0.00	6,905.92	21,612.40	17,590.40	46,108.72

CIN: U45309DL2016PLC304822

Notes to Financial Statements as at and for the year ended 31st March, 2024

At present, the Company does expects to repay all liabilities at their contractual maturity. In order to meet such cash commitments, the operating activity is expected to generate sufficient cash inflows.

Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk:

interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk.

Interest Rate Risk

As infrastructure development and construction business is capital intensive, the company is exposed to interest rate risks. The company's infrastructure development and construction projects are funded to a large extent by debt and any increase in interest expense may have an adverse effect on our results of operations and financial condition. The company current debt facilities carry interest at variable rates with the provision for periodic reset of interest rates. As of March 31, 2024, the majority of the company indebtedness was subject to variable/fixed interest rates.

The interest rate risk exposure is mainly from changes in floating interest rates. The interest rate are disclosed in the respective notes to the financial statement of the Company. The following table analyse the breakdown of the financial assets and liabilities by type of interest rate:

		(₹ In Lakhs)
Particulars	March 31,	March 31,
	2024	2023
Variable Interest bearing		
- Borrowings	39,179.37	43,406.00
Total	39,179.37	43,406.00

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

		(₹ In Lakhs)
Particulars	March 31,	March 31,
	2024	2023
Increase in basis points	50 bps	50 bps
Effect on profit before tax	(195.90)	(217.03)
Decrease in basis points	50 bps	50 bps
Effect on profit before tax	195.90	217.03

Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. During the period, Company did not enter into any foreign currency transaction, hence, the sensitivity analysis is not required.

Commodity Price Risk

The company requires for implementation (construction, operation and maintenance) of the projects, such as cement, bitumen, steel and other construction materials. For which, the company entered the fixed price contract with the EPC contractor and O&M Contractor so as to manage our exposure to price increases in raw materials. Hence, the sensitivity analysis is not required.

Note 33: Capital management

For the purpose of the Company's capital management, capital includes issued equity capital, share premium and all other equity reserves attributable to the equity holders of the parent. The primary objective of the Company's capital management is to maximise the shareholder value.

Capital includes equity attributable to the equity holders to ensure that it maintains an efficient capital structure and healthy capital ratios in order to support its business and maximise shareholder value. The Company manages its capital structure and makes adjustments to it, in light of changes in economic conditions or its business requirements. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. No changes were made in the objectives, policies or processes during the period ended March 31, 2024 and March 31, 2023.

The Company monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. Net debt is calculated as loans and borrowings less cash and cash equivalents.

		(₹ In Lakhs)
Particulars	March 31,	March 31,
	2024	2023
Borrowings	39,179.37	43,406.00
Other Financial Liabilities	278.47	312.74
Less: cash and cash equivalents	(15,939.07)	(350.48)
Net debt	23,518.77	43,368.26
Equity	7,500.00	7,500.00
Share premium	-	-
Other Reserves	5,491.78	3,583.17
Instruments Entirely Equity in Nature	10,748.00	10,748.00
Total sponsor capital	23,739.78	21,831.17
Capital and net debt	47,258.55	65,199.44
Gearing ratio (%)	49.77%	66.52%

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current year. No changes were made in the objectives, policies or processes for managing capital during the year ended March 31, 2024, year ended March 31 2023.

Notes to Financial Statements as at and for the year ended 31st March, 2024 (All figures are Rupess in lakh unless otherwise stated)

Note 38: Disclosure of Financial Ratios

Sr. No.	Particulars	For the Year Ended March 31, 2024	Ended March 31,	% of Change	Reason
1	Current Ratio	4.99	3.64	37.26 %	Increased majorly due to Current year Operation Cash accruals in Cash & Bank
2	Debt Equity Ratio	0.23	0.26	(9.74)%	-
3	Debt Service Coverage Ratio #	1.53	1.20	27.03 %	Due to increase in receipt of Annuity, O&M Annuity and Interest on Annuity during the year as compared to the previous year.
4	Return on Equity Ratio	0.21	0.16	26.86 %	Due to Increase in Financial Income recgonised on Receivable from NHAI under SCA on the basis of Project IRR.
5	Inventory turnover ratio *	NIL	NIL	NIL	•
6	Trade Receivables turnover ratio	2.26	1.82	24.55 %	
7	Trade payables turnover ratio	1.34	0.88	52.39 %	Opening Trade payables paid from current year operational cash accruals.
8	Net profit ratio	50.33%	32.95%	52.77 %	Due to Increase in Financial Income recgonised on Receivable from NHAI under
9	Return on Capital employed	8.62%	5.73%	50.64 %	SCA on the basis of Project IRR.
10	Net capital turnover ratio	0.45	0.57	(20.57)%	Working Capital decreased during the year as compared to previous year.
11	Return on investment **	NIL	NIL	NIL	-

Formula used for calculating the below mention ratios:

- 1) Current Ratio = Current Assets / Current Liabilities
- 2) Debt Equity Ratio = Outstanding Debt / Net Worth

(Net worth = Share Capital + Other Equity + Compulsorily Convertible Debentures + Concession Authority Grant received in Cash + Mobilisation Advance

- Outstanding Debt = Non Current Borrowings + Current Borrowings + Current Maturities of Non Current Borrowings)
- 3) Debt Service Coverage Ratio (DSCR) = (Net Cash Accruals) / (Interest on borrowings + Scheduled principal repayment of long term borrowings (excluding prepayments/refinancing))
- 4) Return on Equity = Profit After Tax / Average Shareholder's Equity
- 5) Inventory Turnover Ratio = Cost of Goods Sold / Average inventories * 365 / no.of days
- 6) Trade Receivable Turnover Ratio = Net Credit Sales / Average Accounts Receivable * 365 / no.of days
- 7) Trade Payable Turnover Ratio = Net Credit Purchases / Average Accounts Payable * 365 / no.of days
- 8) Net Profit ratio = Net Profit / (Net Sales = Total Sales Sales Return) * 100
- 9) Return on Capital Employed Ratio = EBIT / Capital Employed *100
- 10) Net Capital Turnover Ratio = Net Sales / Working Capital
- 11) Return on Investment = Income on investment / Investment
- * Inventory Turnover is NIL as the Company does not have Inventory
- ** Return on Investment

As per the Facility Agreement dated 21st July, 2022, the Company has calculated Debt service coverage ratio after taking into consideration the actual annuities and cash flow received by the Company for Construction and Maintenance activities which constitutes earnings available for debt servicing to the Company (net of expenses).
