PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

2. Policy and Objective

QHSE Policy

We, at ASHOKA Buildcon Ltd. are committed to become an icon in infrastructure development, through innovation, professionalism, active leadership in product quality and sustained growth by delivering value to our customers.

We shall conduct our operations in a manner so that we protect people, property and the environment by identifying, controlling and reducing all associated risks to a level As Low As Reasonably Practicable.

This will be achieved by:

1. Our commitment to continual improvement of quality, environmental and occupational health and safety management system performance.
2. Commitment to prevention of pollution, injuries and ill health.
3. Complying with all applicable legal and contractual requirements.
4. Adopting state of art technology available.
5. Communicating and consulting all associated stakeholders for establishing organizational objectives.

Chairman

Date: 1st August 2013

This Policy will be implemented by the road project Site and Management prior to commencement of construction of the Project. A copy will be provided to every employee of the company and will form part of the contract with sub-contractors engaged in activities associated with design, pre-construction, construction and operation and maintenance.

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

Objectives and Targets

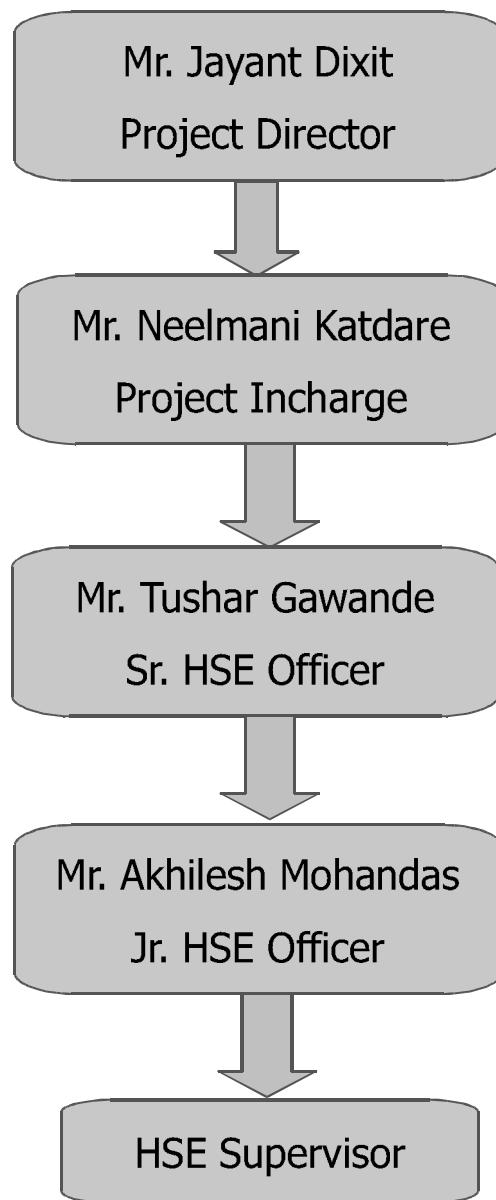

Quality, Health, Safety and
Environmental Objectives:

- To improve planning
- To reduce customer complaints
- To enhance motivation of employees
- To improve skills through training
- Complying with all the statutory rules and regulations.
- Minimizing Air, Land and Water Pollution and preventing injuries and ill health.

Ashoka Buildcon Limited
Ashoka House, Ashoka Marg, Nashik -422 001, Maharashtra, India

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

2. ENVIRONMENTAL ORGANISATIONAL STRUCTURE:

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

ROLES & RESPONSIBILITIES

The responsibility of implementation of the Environmental Management Plan rests with the following personnel involved in the implementation of the project.

PROJECT DIRECTOR

The Project Director is responsible for the overall implementation of the project. Project Director is responsible for undertaking the engineering, procurement and construction of the project.

- Guiding the formation of Policy & its Approval
- Giving the guideline for the Budget & its Approval
- Review of the safety & Environment Procedure & its Approval
- To provide guideline for All legal aspect of project & comply all environment legal rules & regulation.
- To provide guidance for the implementation of OHSAS & EMS System

PROJECT INCHARGE / SR. GENERAL MANGER

The Project Incharge / Sr. General Manager is responsible for the overall implementation of the project. The Project Incharge / SGM is responsible for undertaking the engineering, procurement and construction of the project. The SGM shall oversee the implementation of the EMP by assigning the necessary resources and periodically review the effective use of the EMP on site.

HSE Officer:-

- Implementing the HSE&S Manual, Environment Safety and Social Management Plan, Emergency preparedness plan and EPC HSE-Work Instructions;
- Train the workers and employee as per the training programs ;
- Prepare the HSE Training program as per the site specific requirement;
- Carry out HIRA (Hazard identification and risk assessment) & EAI (Environmental Aspects and its Impacts) and prepare mitigation measures and approve it from Head- HSE&S ;
- Identify the IDLH /Risk and guide to process owner of risk for control measures.
- Daily Safety Observation Tour, Work place Monitoring, Safety Findings to be recorded & Informed to site Project Incharge and Process Owners;
- Conducting Safety Committee Meeting including preparation of agenda, near miss & accidents reports & forward to Corporate Office before 3rd of every month;
- Monthly HSE Report sending to be sent HSE- Corporate Manager before 3rd day of every month;
- Emergency preparedness plan and its effectiveness report (i.e. Mockdrill Report) on quarterly basis;
- Visit the labour camp, Workers canteen to do the audit on welfare provided and required.
- Accident reporting within 12 hours as per the Corporate guidelines to concern Govt. Authority and Head-HSE & S.

RESIDENT ENGINEER (RE) - ROAD AND BRIDGE WORKS

The Project Engineer - Road Works shall be responsible for implementation of the EMP during the construction of the road works. He being responsible for day to day operations with regards to road works shall supervise and oversee construction activities such as site clearances, stripping of top soil, excavations. Filling and laying material etc. which necessitates the operation of construction equipment and machinery at the site.

These activities would have environmental effects in terms of impairment to noise and air quality, tree cutting and severances and hence shall be responsible for implementing the EMP in the day to day activities of road construction. The Project Engineer – Bridge Works shall be responsible for implementation of the EMP during the construction of bridge works. These activities would necessitate diversion of roads, cutting of trees and diversion to natural drainage paths which would have a bearing on the environmental quality of the area. The RE (bridge works) shall be responsible for implementation of EMP with respect to environmental aspects during bridge construction.

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

SITE ENGINEERS/SUPERVISORS

The site engineers/supervisors report to the RE and are responsible for day to day operations of construction works in their respective areas. They supervise and oversee the construction activities and hence shall be made responsible for ground the EMP and minimize the impacts during construction. Some of the key aspects that shall be taken up by the site engineers/ supervisors shall include periodic sprinkling of water in inhabited areas during transportation of material and operation of construction machinery.

SUBCONTRACTORS

Sub contractors shall be sensitized on environmental aspects as they form part of the road construction in terms of transportation, earthwork, concrete and form work.

The environmental effects due to and transportation of material, debris removal and residues shall be properly conducted to minimise damage to the environment. The site engineers/supervisors shall be responsible for monitoring the implementation of EMP at this level.

Overall Responsibility - All Employees

Overall responsibility for the environment, social, occupational health and safety management system lies with the Project Head of the SPV who will establish and maintain an organizational structure that defines roles, responsibilities, and authority to implement the EMP. This will include the designation of in-house personnel during the different phases of the Project as described below.

The HSE &S activities will be carried out by SPV, EPC and/or O&M contractor and third parties. All these activities will be undertaken under contract with company and will be supervised by company which will ensure that all contracts include terms and conditions requiring contractors to adopt management systems which comply with the ISO 14001, OHSAS 18001 and with the EMP requirements.

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

4. Statutory Clearances / License Details

Legal and Regulatory Requirements and Applicable International Standards :

Company and its EPC, Sub-contractors are governed by the various legislative rules and regulation set by Ministry of Environment and Forest (MoEF) and concerned pollution control boards.

The following Rules and Regulation are applicable for Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 Project :-

- MOEF Requirement Road construction -- EIA Report & Environment clearance from MOEF – Not Applicable
- Environment Protection Act :1986 - – Applicable
- The Water (Prevention & control of pollution) Act, 1974 - – Applicable
- The Water (Prevention & Control of pollution) Cess Act, 1977, including rules, 1978 - – Applicable
- The Air (Prevention & control of pollution) Act, 1984 - – Applicable
- The Hazardous Waste (Management & Handling) Rules, 2000 - – Not Applicable
- Manufacture, Storage & Import of Hazardous Chemicals Rules, 1989 - – Applicable
- Forest clearance for tree cutting (Local, State and Center if required) -- Applicable
- Local authority or *Grampanchayat* permission (NOC) for establishment of plant - – Applicable
- District Industry Center permission for industry - – Applicable
- Factory Act: 1948 (Crusher, HMP, RMC & CRMB) Plant Establishment - – Applicable
- State Factory Rule (Director of Industrial Safety and Health requirement) - – Applicable
- Building and Other Construction worker Act, 1996 –Not Applicable
- The Mines & Minerals Act, 1957 -- Not Applicable
- Mineral Concession Rules, 1960 - – Not Applicable
- Land acquisition Rule-1998 – Not Applicable
- Petroleum Rules, 1976 (Petroleum & Explosive Department) - – Applicable
- The Indian Electricity Rules, 1956 - – Applicable
- Batteries Act, 1989 - – Applicable
- Minimum Wages Act, 1948 - – Applicable

ENVIRONMENTAL MANAGEMENT PLAN

REV NO DATE: R2 / 30.11.2015

Page 10 of 57

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

Environmental Management Measures - (Part-A)

| Sl. No. | Environmental Issue | Management Measures | Reference Document | Planning and Execution | Responsibility Supervision /Monitoring |
|--|--|---|---------------------------------------|---|---|
| PRE-CONSTRUCTION STAGE | | | | | |
| Pre-construction activities by Karnataka state Highways Improvement Project (KSHIP) | | | | | |
| P 1 | Land Acquisition (If required) | The acquisition of land and private properties shall be carried out in accordance with the RAP and entitlement framework of the Project. KSHIP has to ascertain that acquisition of land in the post design phase are addressed and integrated into the EMP and relevant contract documents. | LA Act 1984 and its Amendments, KSHIP | KSHIP, Revenue Dept, Collaborating Agencies | KSHIP |
| P 2 | Clearance of Encroachment/Squatters (change in land use) | Advance notice, as per RAP shall be given to the encroachers & squatters present in the Corridor of Impact, who need to be relocated. All R&R activities shall be undertaken. Entitlements as per KSHIP entitlement framework shall be completed before construction starts. | RAP documents | KSHIP and Revenue Authority | KSHIP |
| P 3 | Tree Cutting | Trees shall be removed from the Corridor of Impact before the actual commencement of the work with the permission from the state Forest Department. Cutting shall not start until the implementation of the project in that particular location of cutting 100% confirmed. Stacking, transport and storage of the wood shall be done as per the relevant norms. | MORTH 201.6 | AB/Agency engaged by KSHIP | CSC and / KSHIP |
| P 4 | Preservation of Trees | All efforts shall be made to preserve trees including evaluation of minor design adjustments/alternatives (as applicable) to save trees. Specific attention shall be given for protecting giant trees, green tunnels and locally important trees (religiously important etc.). Detail of the trees affected due to the proposed project road is given in (Appendix – 10) Tree cutting is to proceed only after all the legal requirements including attaining of In-principle and Formal Clearances from the Forest Dept./MoEF are completed and subsequently a written order is issued to the Contractor. Particular species declared as "protected" by the State's Forest Dept. in the private land shall be felled only after due clearance from the Forest Dept. is obtained. | Appendix-10 | AB/Agency engaged by KSHIP | CSC and / KSHIP |

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

| Sl. No. | Environmental Issue | Management Measures | Reference Document | Planning and Execution | Responsibility Supervision /Monitoring |
|---|---|--|------------------------------|--------------------------------------|--|
| | | | | | |
| | | In the event of design changes, additional assessments including the possibility to save trees shall be made. Systematic corridor level documentation for the trees cut and those saved shall be maintained by the KSHIP | | | |
| P 5 | Relocation of Community Utilities and Common Property Resources | All community utilities and properties i.e., hand pumps, open wells, water supply lines, sewer lines, telephone cables, buildings and health centers shall not be relocated before construction starts in the project road. Details of the community properties affected are provided in Chapter-2 Summary of Impacts. | RAP document | KSHIP, other Agencies / ABL | KSHIP |
| P 6 | Relocation of affected Cultural and Religious Properties | All religious property resources such as shrines, temples and mosques within the project road shall be relocated. A list of cultural properties affected is given in the Chapter-2 Summary of Impacts. If there is any relocation of the religious structures may happen then it shall be identified in accordance with the choice of the community. KSHIP in consultation with local people shall finalize those. The entire process (i.e. selection of relocation sites and design) shall be under supervision of Environmental Specialist of CSC, during the construction stage by the Contractor. The relocation shall be completed before the construction starts in these sites. | Chapter-2 Summary of Impacts | KSHIP/ ABL | CSC/ KSHIP |
| Pre-construction activities by the ABL/Environmental Specialist of CSC | | | | | |
| P 7 Field Verification and Modification of the Contract Documents | | The Environmental Specialist of CSC and the Contractor shall carry out joint field verification to ascertain any possibilities of saving trees, environmental and community resources, & these activities are to be taken up by the construction Contractor. | | ABL/ Environmental Specialist of CSC | KSHIP |
| P.7.1 | Joint Field Verification | | | | |
| P.7.2 | Assessment of Impacts due to Changes/Revisio | The Environmental Specialist of CSC shall assess impacts and revise/modify the EMP and other required sections of the project document/s in the event of changes/revisions (including addition or deletion) in the project's scope of | | ABL/ Environmental Specialist of | KSHIP |

|------------|---|---|--|--------------------------------------|--|
| | | | | CSC | |
| P.7.3 | Crushers, Hot mix plants and Batching Plants Location | All construction plants shall be sited sufficiently away from settlements and agricultural operations or any commercial establishments. Such plants shall be located at least 100m away from the nearest dwelling preferably in the downwind direction. The Contractor shall submit a detailed layout plan for all such sites and approval of Environmental Specialist of CSC shall be necessary prior to the establishment. Arrangements to control dust pollution through provision of windscreens, water sprinklers, and dust extraction systems shall have to be provided at all such sites. Specifications for crushers, hot mix plants and batching plants shall comply with the requirements of the relevant emission control legislations. Consent for the Establishment and Operation from KSPCB shall be obtained before establishment and operation respectively and a copy should be submitted to the CSC and KSHIP. Wherever there is extremely water scarcity areas exist the Water sprinkling shall be limited to one time in the morning. To balance this deficient information boards shall be erected at appropriate locations with a message to "Dust prone area take precautions. | MORTH 111.1, Air Control Act, and Noise Rules | ABL/ Environmental Specialist of CSC | KSHIP |
| P.7.4 | Other Construction Vehicles, Equipment and Machinery | All vehicles, equipment and machinery to be procured for construction shall confirm to the relevant Bureau of India Standard (BIS) norms. The discharge standards promulgated under the Environment Protection Act, 1986 and Motor Vehicles Act, 1988 shall be strictly adhered to. The silent/quiet equipment available in the market shall be used in the Project. The Contractor shall maintain a record of PUC for all vehicles and machinery | Air pollution Control Act, and Noise Rules and Motor Vehicle Act, 1988 | ABL/ Environmental Specialist of CSC | KSHIP |

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

| | | | | | |
| P.8 | Identification and Selection of Material Sources | Finalizing soil borrowing earth and all logistic arrangements as well as compliance to environmental requirements, as applicable, shall be the sole responsibility of the Contractor. (Appendix-17). The Contractor shall not start borrowing earth from selected borrow area until the formal agreement is signed between landowner and Contractor and a copy is submitted to the CSC. Locations finalized by the Contractor shall be reported to the Environmental Specialist of CSC and he shall submit the report to KSHIP. Planning of haul roads for accessing borrows areas shall be undertaken during this stage. The haul roads shall be routed to avoid agricultural areas as far as possible and shall use the existing village roads wherever available. The environmental personnel of the CSC shall be required to inspect every borrow area location prior to approval. The CSC should include the Request for Inspection form for borrow area approval from the environmental point of view. | Appendix-16, 17 | ABL/ Environmental Specialist of CSC | KSHIP |
| P.8.1 | Borrow Areas | Contractor shall finalize the quarry for procurement of construction materials after assessment of the availability of sufficient quantity of materials, quality and other logistic arrangements. In case the Contractor decides to use quarries other than recommended by DPR consultant, then the Contractor should give substantiation. Contractor shall also work out haul road network and report to Environmental Specialist of CSC and CSC shall inspect and in turn report to KSHIP before approval | MORTH 111.3 & Appendix-17, 19 | ABL | Environmenta l Specialist of CSC |
| P.8.2 | Quarry | In view of the special situation in Karnataka, Contractor shall prepare and implement the approved Water Management Plan in accordance with the | Appendix-15 and Appendix-16 | ABL | Environmenta l Specialist of CSC |
| P.8.3 | Arrangement for Construction | | | | |

| C.1.2 | Disposal of Debris from dismantling structures, road surface and hill ward side excavation for widening of the road | <p>after the receipt of KSHIP's written permission in this regard. Vegetation only with girth size of over 30 cm shall be considered as trees and shall be compensated, in the event of KSHIP's instruction to undertake tree cutting.</p> <p>Appendix-1 provides guidelines for the preparation of the contractors debris disposal plan. This is mainly to deal with surplus debris materials that would be available after adjusting for all insitu applications.</p> <p>Other debris generated due to dismantling of the existing road shall be suitably reused in the proposed construction zone, subjected to the structure suitability of the materials and approval of the Resident Engineer and Environmental Expert of CSC as follows:</p> <p>For filling and levelling of School grounds and proposed parking areas.</p> <p>The sub grade of the existing pavement shall be used as embankment fill material.</p> <p>Existing base and sub-base material shall be recycled as sub-base of the haul road or access roads.</p> <p>The existing bitumen surface may be utilized for the paving of cross roads, access roads and paving works in construction sites and campus, temporary traffic diversions, haulage routes etc. (Appendix - 5)</p> <p>The Contractor shall suitably dispose off unutilized debris materials either through filling up of borrow areas located in wasteland or at pre-designated disposal locations, subject to the approval of the Environmental Expert of CSC.</p> <p>At locations identified for disposal of bituminous wastes, the disposal shall be carried out over a 30 mm thick layer of rammed clay so as to eliminate the possibility of scarified percolation of leachate into the ground water. The Contractor shall ensure that the surface area of such disposal pits is covered with a layer of soil & subsequent turfing (Appendix - 5).</p> <p>All arrangements for transportation during construction including provision, maintenance, dismantling and clearing debris, shall be considered incidental to the work and shall be planned and implemented by the Contractor as approved and</p> | MORTH 202 Appendix-1 | ABL | Environmental Specialist and Resident Engineer of CSC, EC, KSHIP |

|------------------------------|--|---|-------------------------------------|------------------------|---|
| | | | | | |
| C.3 Construction Work | | | | | |
| C.3.1 | River Training and Disruption to Other Users of Water | While working across or close to any perennial water bodies, Contractor shall not obstruct/prevent the flow of water. Construction over and close to the non-perennial streams shall be undertaken in the dry season. If construction work is expected to disrupt users of community water bodies, notice shall be served well in advance to the affected community. | MORTH:304.3. 2 | ABL | Environmental Specialist of CSC, KSHIP |
| C.3.2 | Drainage and Flood Control | Contractor shall ensure that no construction materials like earth, stone, or appendage disposed off in a manner that block the flow of water of any water course and cross drainage channels. Contractor shall take all necessary measures to prevent any blockage to the water flow. In addition to the design requirements, the Contractor shall take all required measures as directed by the Environmental Specialist of CSC to prevent temporary or permanent flooding of the site or any adjacent area. | MORTH:305.3. 7 | ABL | Environmental Specialist of CSC, KSHIP |
| C.3.3 | Siltation of Water Bodies and Degradation of Water Quality | The Contractor shall not excavate beds of any stream/canals/any other water body for borrowing earth for embankment construction. Contractor shall construct silt fencing at the base of the embankment construction for the entire perimeter of any water body (including springs and wells) adjacent to the project road and around the stockpiles at the construction sites including ancillary sites close to water bodies. The fencing shall be provided prior to commencement of earthwork and continue till the stabilization of the embankment slopes, on the particular sub-section of the road. Contractor shall ensure that construction materials containing fine particles are stored in an enclosure such that sediment-laden water does not drain into nearby watercourse. | MORTH:306 (Silt Fencing) Appendix-3 | ABL | Environmental Specialist of CSC, KSHIP |
| C.3.4 | Slope Protection and Control of Soil Erosion | The Contractor shall construct slope Protection works as per design, or as directed by the Environmental Specialist of CSC to control soil erosion and sedimentation through use of Breast walls, Retaining Walls, Plot Bioengineering methods, dykes, sedimentation chambers, basins, fibber mats, mulches, grasses, slope, drains and other devices. | MORTH:305.2. 2.2 | ABL | Environmental Specialist of CSC, KSHIP |

| | | construction plant located in a cluster of industries should be less than 500 µg. The environmental monitoring is to be conducted as per the monitoring plan. Alternatively, only crushers licensed by the KSPCB shall be used. The Environmental Specialist, EO and KSHIP through the Engineer shall submit required certificates and consents. | 16) | | Environmental Specialist of CSC, KSHIP |
| C.4.2. 2 | Emission from Construction Vehicles, Equipment and Machineries | Contractor shall ensure that all vehicles, equipment and machinery used for construction are regularly maintained and confirm that pollution emission levels comply with the relevant statutory requirements of CPCB and/Motor Vehicles Rules. The Contractor shall submit PUC certificates for all vehicles/equipment/machinery used for the Project. | Appendix-16 | ABL | Environmental Specialist of CSC, KSHIP |
| C.4.3 | Noise Pollution | The Contractor shall confirm the following: All Construction plants and equipment used in construction shall strictly conform to All MoEF/CPCB noise standards. All Vehicles and equipment used in construction shall be fitted with exhaust silencers. Servicing of all construction vehicles and machinery shall be done regularly and during routine servicing operations, the effectiveness of exhaust silencers shall be checked and if found defective shall be replaced. The equipment available in the market should be procured, if the Contractor plans to purchase new equipment. For the old equipment, necessary or possible alterations must be carried out to reduce the noise levels to the possible extent. Maintenance of vehicles, equipment and machinery shall be regular and up to the satisfaction of the Environmental Specialist of CSC to keep noise levels at the minimum. At the construction sites within 150 m of the nearest habitation, noisy construction work such as crushing, operation of DG sets, use of high noise generation equipment shall be stopped during the night time between 10.00 pm to 6.00 am. | Noise Rules Published by MoEF Appendix-6 & Appendix-7 | ABL | Environmental Specialist of CSC, KSHIP |

| | | | | | |
| C.5.6 | First Aid | The Contractor shall arrange for – A readily available first aid unit including an adequate supply of sterilized dressing materials and appliances as per the Factories Rules in every work zone. Availability of suitable transport at all times to take injured or sick person(s) to the nearest hospital. Equipment and trained nursing staff at construction camp. | Contract requirement Appendix-9 | ABL | Environmental Specialist of CSC, KSHIP |
| C.5.7 | Informatory Signs and Hoardings | The Contractor shall provide, erect and maintain information/safety signs, hoardings written in English and local language (Kannada), wherever required or as suggested by the Environmental Specialist of CSC. | MORTHI-801 & MORTTH-802 | ABL | Environmental Specialist of CSC, KSHIP |
| C.6 Flora and Fauna: Plantation/Preservation/Conservation Measures | | | | | |
| C.6.1 | Road Plantation Strategy | side The Contractor shall do turfing on embankment slopes, plantation of shrubs as specified in the Contract. The compensatory forestation shall be carried out by the State Forest Department. Minimum 80 percent survival rate of the saplings shall be acceptable otherwise the Contractor/Forest Department shall replace dead plants at his own cost. The Environmental Specialist of CSC shall inspect regularly the survival rate of the trees planted by the Contractor in accordance with the plantation strategy suggested. | Appendix-10 | ABL | Environmental Specialist of CSC, KSHIP |
| C.6.2 | Flora and chance found Fauna | The Contractor shall take reasonable precaution to prevent his workmen or any other persons from removing and damaging any flora (plant/vegetation) and fauna (animal) including fishing in any water body and hunting of any animal. If any animal is found near the construction site at any point of time, the Contractor shall immediately upon discovery thereof acquaint in the Environmental Specialist of CSC and carry out his instructions for dealing with the same. Environmental Specialist of CSC shall report to the near by forest office (range office or divisional office) and shall take appropriate steps/measures, if required in consultation with the forest officials. | Appendix-13 | ABL | Environmental Specialist of CSC, KSHIP |
| C.6.3 | Chance Found | All fossils, coins, articles of antiquity, structures and other remains of | Appendix-11 | ABL | Environmental |

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

| Sl. No. | Environmental Issue | Management Measures | Reference Document | Planning and Execution | Responsibility Supervision /Monitoring |
|--------------|------------------------------|---|--|------------------------|--|
| | | | | | |
| | | The Contractor shall reduce dust nuisance from construction sites by sprinkling of water, encapsulation of dust source and by erection of screen/barriers. Vehicle delivering material shall be covered. End boards in loaders shall be provided to prevent spillage. Water shall also be sprayed on temporary access roads and diversions. The air pollution monitoring shall be carried out as per monitoring and reporting programme detailed in Environment Assessment and Management Plan. | Specifications for Road and Bridge Works Air (P&CP) Act Appendix-7 Appendix-16 | | (KSHIP) |
| C.2.3 | Noise Pollution | Noise Pollution: Noise from Vehicles, Plants and Equipments | The demolition of bridges/rehabilitation of bridges shall be done using good engineering practices so that noise levels are kept at acceptable levels. If required screens shall be erected around the construction sites. | Appendix-16 | ABL |
| C.3 | Safety | Tool Box Meetings | Tool box meeting shall be held at least once a week in order to brief workers about safety do's and don't during construction. Toolbox safety meetings are on the job meetings and shall keep employees alert to work related accidents and illness. A toolbox meeting helps alert employees to workplace hazards, and by preventing accidents, illness and on the job injuries. The meeting should involve groups of people who work together and face same sort of injury risks. The meetings should be so designed to raise employee's awareness following hazardous incidents, a recent injury or near miss. Toolbox meeting improve workplace safety and health, provide information and instructions, improve consultation and help identify hazards and deciding what action needs to be taken to reduce the risks. | Appendix-9 | ABL |
| C.3.1 | Personal Measures for Labour | Safety for | Contractor shall provide: <ul style="list-style-type: none">• Protective footwear, goggles and clothing to all workers employed on laying of wearing coat, preparing cement mortars for brick work, concreting, painting etc.• Welder's protective eye shields to workers who are engaged in welding works• Earplugs to workers exposed to loud noise, and workers working with jack hammer, joint cutting machines, vibrators etc.• Adequate safety measures for workers during handling of materials at site are taken up. | Appendix-9 | ABL |

| | | | | | |
| | | <p>Any skin contacts with epoxy materials; solvents and epoxy strippers should be avoided. Epoxy resin can cause irritation of skin particularly epoxy hardeners (B component) may cause a rash on skin in sensitive persons if incorrectly handled. The resin and hardener should not be allowed to come into direct contact with skin. The most effective protection is achieved by wearing polythene gloves, rubber gloves, with a cloth liner, and protective clothing. The official toxicity classification on container labels may be looked for before starting work. Barrier creams are recommended but are not substitutes for protective clothing. Eyes shall be protected where splashing could occur while spraying. Good ventilation shall be ensured and inhalation of vapors avoided. If materials are sprayed, a respirator shall be used. If skin contact occurs, it shall be immediately washed with a cleaner, followed by soap and water. Should eye contact occur, it shall be flushed immediately with plenty of water for 15 minutes and a doctor called for. If contact occurs with the clothing, it shall be immediately changed to prevent further skin contact, and if the contact occurs with component A or B, the clothing shall be thrown away. Hardened epoxy is not harmful but shall break the clothing. All emptied used buckets; rags and containers shall be removed from site. These shall be stored in waste disposal bags and suitable disposed.</p> <p>The Contractor shall prepare a hazardous waste management and disposal plan and shall submit a copy of it to Environmental Officer (KSHIP) for review and supervision.</p> | Appendix-14 | ABL | CSC & Environmental Officer, CMU (KSHIP) |
| C.3.3 | Traffic Management and Safety | <p>The Contractor shall ensure that temporary bridges constructed for diversion of traffic are as per norms and safe and approved by Environmental Officer.</p> <p>Speed limits shall be set for movement of traffic on temporary bridges.</p> <p>The Contractor shall take all necessary measures for the safety of traffic during construction and provide, erect and maintain such barricades, including sign, markings, flags, lights, warning boards and flagmen as proposed in the Traffic Control Plan/Drawings and as required by the Environmental Officer for the information and protection of traffic approaching or passing the bridge under construction or through the temporary diversion.</p> <p>The Contractor shall ensure that all signs, barricades markings are provided as per the MORTH specifications. Before taking up of construction on any bridge site, a Traffic Control Plan shall</p> | | | |

| | | The bridge construction site shall be left clean and tidy, at the contractor's expense, to the satisfaction to the Environmental Officer. | | | |
| OPERATION STAGE | | | | | |
| Activities to be Carried Out by the CMU (Construction Management Unit) | | | | | |
| O.1 | Monitoring Operation Performance | The KSHIP shall monitor the operational performance of the various mitigation measures carried out in the form of river training works as a part of the project The indicators selected for monitoring include the water quality status, Soil erosion etc. | Appendix-12 | KSHIP | KSHIP |
| O.2 | Pollution Monitoring | The periodic monitoring of the surface water quality at the selected locations as suggested in pollution monitoring plan shall be responsibility of KSHIP. These locations shall be monitored once during operation stage. | Appendix-12 | Pollution Monitoring Agency through CMU | KSHIP |
| O.3 | Safety Measures | Contractor shall submit Accident Safety and Hazardous Chemical Spill Management Plan and shall get it approved by the "EO KSHIP". The plan should also have details of detours in case of emergency. | Appendix-20 | | |

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

WASTE MANAGEMENT PLAN

Objective: Minimise the generation of waste/ maximise the internal and external recycling of materials/ Minimise the volume of solid waste requiring disposal by landfill.

1. THE TYPES OF WASTE GENERATED AT SITE INCLUDE

- A** Hazardous waste (Used oil from DG Sets)
- B** Metal scraps
- C** Bio-degradable (Office and colony waste)
- D** Non- Bio-degradable (Plastic bag, thermocol)
- E** Construction debris
- F** Excavated soil
- G** Used electrical /wood/ plastic and other miscellaneous waste item
- H** Pb-Acid Batteries

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

| Waste Class | TYPE OF WASTE | DISPOSAL PLAN | STORAGE GUIDELINES | REMARKS |
|-------------|--|--|---|--|
| A | Hazardous waste (Used oil from DG Sets) | Concrete platform with sump/ collection tray, to be sent for recycle purpose, to be disposal by buy-back arrangement with suppliers. Storage of the oil drums should be in trip trays. | Sold to authorized recycler, Label Drum segregated areas, Applicable to DPCC for storage authorization, No Contamination of land storage to be done in concrete area. | Used Oil to be sold to CPCB authorized recycler only as per "The hazardous waste (M & H) rules , 2003" |
| B | Metal scraps | Cutting in small pieces for barricade purpose | Scrap yards (TP-3) | Reused at the site |
| C | Biodegradable (Office and colony waste) | Shall be disposed off in coordination with the civic authorities. Segregation of waste (site, office and colony) should be done including colour coding of the different waste containers. | Dust bins | |
| D | Non-Biodegradable (Plastic bag, thermocol) | Sold to recycler if in large quantities | Storage area duly marked.(All sites) | |
| E | Construction debris | To be disposed only on municipal permitted land | Select/designated location only (waste yard) | |

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

| | | | | |
|---|---|--|--|--|
| F | Excavated soil | Collected and transferred through dumpers used for levelling. | | |
| G | Used electrical /wood/ plastic and other miscellaneous waste item | Sold to recycler if in large quantities | | |
| H | Pb-Acid Batteries | To be stored properly in identified area recycles as per batteries (Management & Handling) rules ,2006 | To be sold to either manufactures /dealer / authorized | |

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

PRECAUTION GENERAL CONTROL

- Waste shall not be thrown in nallah causing public obstruction or private party & Government land.
- Construction debris shall be sold to contractor with instruction for disposal on municipal and sites only
- Use PPE while handling the waste
- No burning of waste at site shall be permitted.
- Allocate sufficient space and resources for effective and efficient waste management.
- Segregate different types of waste as they are generated.
- Use containers suitable for their contents. Consider using colour coding.
- Use containers suitable for their contents. Check that containers are not corroded or worn-out.
- Minimise the risk of accident spillage's or leaks. Provide covers and bunds to prevent evaporation and spillage of waste.
- Ensure that waste cannot blow away. Avoid mixing different types of wastes unless it is known that mixing is harmless and will have no adverse effects on the subsequent management of the waste.
- segregation of waste (Site, Office & Colony) shall be done including color coading of different waste contains.
- All work sites shall be declared as no smoking zones.
- Used oil from DG set is not permitted for shuttering purpose.

The general construction waste could be:

- Debris
- Mud
- Reinforcement pieces
- Cement
- Concrete blocks
- Wood
- Hazardous chemicals
- Oil
- Plastics
- Tiles, blocks, bricks, etc

Reduce Wastage of materials during:

Ordering:

Avoid:

- Over ordering
- Ordering for delivery from suppliers at wrong time

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

Delivery:

Avoid:

- Damage during unloading
- Delivery of material to in appropriate areas of site
- Accepting incorrect deliveries, specifications or quantity.

Storage:

Avoid:

- Exceeding shelf lives
- Damage or contamination from incorrect storage
- Loss, theft and vandalism

Handling:

Avoid:

- Damage or spillage through incorrect or repetitive handling.

Minimise the disposal cost by reusing or recycling waste that is generated on sites. This can be done easily if the wastes are properly segregated.

Examples of materials arising as wastes on site that may be reused or recycled are given below:

| TYPE OF WASTE | CAN BE REUSED OR RECYCLED |
|-------------------------------|--|
| Concrete | Recycle for use as aggregate in new concrete |
| Excavated soil | Recycle for use as fill Reuse for landscaping |
| Top soil | Reuse for landscaping |
| Timber | Reuse e.g.: for shuttering/hoarding Recycle chipboard |
| Metals | Recycle |
| Architectural features | Reuse |
| Clay, concrete pipes, | Reuse |
| Plastics | Recycle in consultation with the suppliers |

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

MANAGEMENT ACTIONS:

- Construction site, construction camps and all other sites (access roads, storage areas...) shall be kept clean at all times;
- Littering shall be prevented by supply of adequate containers emptied on a regular basis;
- Re-use and recycling opportunities shall be systematically investigated;
- Separation at source shall be implemented, by designating a separate waste disposal area where different types of waste can be brought and separated;
- Temporary storage of waste on site shall be limited to designated weather proof and scavenger proof areas; waste sorting and temporary storage area shall be regularly controlled;
- Final disposal facilities (landfill, incinerators), if already existing, shall be compliant with local (licensed) and international environmental standards; Where new disposal areas are created, an environmental impact study of disposal commensurate to the size and importance of the infrastructure shall be carried out including alternative analysis, potential impacts and management regarding soil, ground and surface water contamination and closure and reclamation measures;
- On site burning, burying or dumping of any waste materials, vegetation, litter or refuse shall not be permitted, as a general rule;

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

SITE MANAGEMENT PLAN

1 Site clearing Management Plans:

- Prior starting of construction activities, detailed plans and layout of the different sites (construction site, construction village, access roads, temporary or permanent disposal sites shall be produced;

Preservation:

- Avoid unnecessary removal of vegetation; areas to be left intact must be clearly demarcated;
- Large trees shall be preserved as far as possible; they are to be adequately marked and protected (fenced);
- If the construction site is close to sensitive ecological areas, it is recommended that buffer zones should be established to ensure survival of fauna and flora species; "No-go" areas shall be clearly marked on a site layout plan and demarcated through fencing or other measure;

Clearing methods

- Burning shall not be used in all sites.
- It is recommended that use of chemical clearing methods shall be prohibited in the vicinity of no go areas.
- have negligible adverse human health effect be shown to be effective against the target species

Erosion management

- Sensitive erosion areas should be identified, and location of works minimized in these areas;
- Where possible, and depending on local conditions, it is recommended that works in sensitive erosion areas to be restricted to the dry season ;
- Stabilize slopes that are disturbed during construction to prevent erosion through runoff;
- Traffic and movement over stabilised areas shall be controlled.

Demolition

- In case of a brown field site, liabilities shall be addressed in the contractual documentation;
- Demolition waste shall be adequately sorted and disposed of to minimize their volume (potential reuse) and contamination by hazardous waste.

Materials Management Plans:

Hazardous Materials (HazMat)

- All hazardous materials must be stored in clearly labelled containers;
- All chemicals and waste considered as potentially hazardous materials shall be registered in order to follow-up type, quantities stored, quantities used or generated;
- It is recommended that lead-free and asbestos free materials should be used;
- Transformers or equipment containing polychlorinated biphenyls (PCBs) shall not be used on the building site;

Materials handling

- Concerned workers shall be trained to safety procedures applicable to the handling and use of hazardous materials;
- Explosives storage facilities shall be kept locked and access limited to authorized staff;
- Transportation schedule for transfer of significant quantities of hazardous materials must be specified. It is recommended to limit such transfers to off-peak periods;
- Concrete shall not be mixed directly on the ground; care shall be taken to prevent cement to enter water bodies;

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

- It is recommended that, where possible, loading and unloading of materials occur in bounded areas to contain any potential spillage;
- Surfaces of refuelling areas shall be protected to prevent any soil contamination;
- During transportation, materials shall be appropriately secured. Loads including but not limited to sand, stone chip, fine vegetation, refuse, paper and cement shall have appropriate cover to prevent materials spilling from the vehicles;

Materials storage management Plan:

- All materials storage areas and stockpiles shall be designed and managed so as to reduce the risk of spillages, contamination of soils, groundwater, surface water and storm water;
- As far as possible, material storage areas should be positioned away from ecologically sensitive areas and outside the 1:50 flood line of watercourses;
- Appropriate secondary containment shall be installed around storage tanks and materials stores;
- Fuel stores shall be placed on a bunded area, with the bund accommodating 110% at least of the volume of the largest tank. Tanks containing fuels shall have lids and remain firmly shut. When necessary, tanks and bunded areas shall be covered by a roof to prevent the bunded area from filling with rainwater;
- Used oil shall be stored at a central location on site prior to removal off site for disposal in an approved place;
- Bulk storage tanks and drums integrity should be regularly tested.
- Storage of oil drums shall be in drip trays.

Leak and spillage Management Plans (Housekeeping):

Objective: When leaks and spillages occur despite efforts to prevent them, minimise negative environmental impacts through rapid and effective containment and clean up actions

Response hierarchy to be implemented in case of a spill of any HazMat:

- seek medical attention for any injured person
- prevent further injury
- prevent environmental damage (eg. by use of containment barriers, absorbent materials or others)
- report the spill
- clean up spill
- remedied area of spill
- final report

Management Actions:

- Any workshop shall have an impermeable floor, bunded or sloped towards an oil trap to prevent any spillages;
- Pumps, compressors and other stationary machinery requiring hydrocarbons shall be placed on drip trays to be emptied and cleaned regularly;.
- All vehicles and equipment shall be serviced regularly.
- Oil and lubricants change, or refueling activities, shall only take place on designated, bunded and covered areas, except for emergency repairs;

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

- Absorbent materials designed to soak up minor hydrocarbon spillages (spill response kits) shall be available in sufficient quantities at all times;
- Any spilled fuel, fuel soaked sand or other contaminated material shall be immediately disposed of as hazardous waste.

Water supply and water use

Objective: Minimize the amount of water used

Management actions:

- Implement water conservation measures (including recycling of gray waters, eg. recycling of wastewater generated from washing down mixer trucks);
- Where water is scarce, ensure that consumption for the construction site will not be detrimental to other users, or that any loss attributable directly to the project be fairly compensated.

Wastewater and storm water management Plans

Definition: Wastewater discharged from construction activities may include:

- Domestic wastewater
- Water from groundwater pumping systems, water used in construction processes (may have a high suspended solids content), water from tunnel dewatering
- Runoff from material depots/workshops/vehicles washing areas and concrete Swills
- Storm water runoff

Objective: Limit degradation of landscape through erosion/ Minimize risk of storm water being contaminated/ Minimize deterioration of groundwater and surface water quality/ Ensure that contaminated water, contaminated run off or effluent discharged from the site in surface waters.

Management actions:

- On construction site, and in the construction site, toilet facilities with adequate waste water treatment must be provided;
- Facilities for workmen shall be provided as per relevant labour laws.
- All domestic wastewater shall be treated on site, or discharged into a conservancy tank for removal from the site and appropriate treatment or directly into the municipal sewerage system, if its performance is acceptable;
- Depots/workshops/vehicles washing areas and concrete swills must be placed and constructed in such a way to limit pollution of groundwater and surrounding areas; the runoff shall be collected (channels) and treated adequately (silt/oil separator, sediment basins...);
- Natural run off shall be diverted away from the construction site and towards storm-water drains where these are available. Appropriate measures to prevent silt and sand entering the drainage system or water courses must be taken (silt screens, straw bale);

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

- Wastewater and storm water discharges (including water from groundwater pumping systems) shall be monitored regularly to ensure that the World Bank limits are not exceeded; the parameters to be monitored will depend on the characteristics of the site, but always include pH, TSS, oil and grease, and coliform bacteria..

Air Quality Monitoring & management Plans:

Objective: Minimise the impacts of dust generation on surrounding communities, and local ecosystems/ Ensure air emissions by construction equipment are compliant with local and international standards through adequate maintenance and servicing

Control of Dust & Air Emissions:

- Air Emissions shall be controlled by using proper Equipments and machines. Equipments maintenance should be carried out at regular intervals.
- Every day morning before the Site operation starts, water spraying should be done to the entire site.
- If possible landscaping should be carried out with minimum cost, since grass can prevent dust. This can be practised looking into the soil conditions of site.
- While transferring the fine aggregate /sand/metal in dumpers make it sure that the material should not spill out of the dumpers.
- The point where the cement is transferred to batching plant or mixer shall be covered with Gunny bags or plastic sheet in order to prevent the accumulation of cement dust particles.

MANAGEMENT ACTIONS:

- Each construction vehicle in the fleet shall be inspected on a regular basis (at least every 6 months);
- Limit vehicle-entrained dust from unpaved roads through traffic control measures (eg limit vehicle speeds, restrict traffic volume);
- Covering of materials likely to result in dust emission during transportation and storage;
- Covering of scaffoldings and use of air extraction equipment, wherever relevant are recommended practices;
- Routine hosing down of unpaved roads and cleaning of vehicles, if necessary and relevant regarding water availability;
- If the location is prone to high winds conditions, specific measures should be implemented depending on weather conditions (Eg. limitation of certain activities such as cement stabilization);
- Workers should not allowed emissions of fugitive dust from any transport, handling, construction or storage activity to remain visible in atmosphere beyond the property line of emission source.
- Do not block or shut vents or construction returns.
- Prohibits smoking inside the construction
- Do not dispose of food waste or food wrappers in work area.
- Dispose of contaminated waste in receptacles that are emptied daily.
- Do not over water plants. Remove dead leaves. Break up dirt around the plant to avoid mold overgrowth in the dirt.

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

- Clean-up water spills immediately.
- Minimize accumulations of paper, cardboard, and other cellulose-based materials.
- Clean work area routinely.
- Do not burn candles or have other scent-producing materials in the work area.
- Avoid portable humidifiers.
- The workers shall provide a wash pit or a wheel washing and/or vehicle cleaning facility at the exits from work sites such as construction depots and batching plants. At such facility, high-pressure water jets will be directed at the wheels of vehicles to remove all spoil and dirt.
- The workers shall cover loads of dust generating materials like debris and soil being transported from construction sites. All trucks carrying loose material should be covered and loaded with sufficient free- board to avoid spills through the tail board or side boards.

Noise and vibration Monitoring & Management Plans:

Management actions:

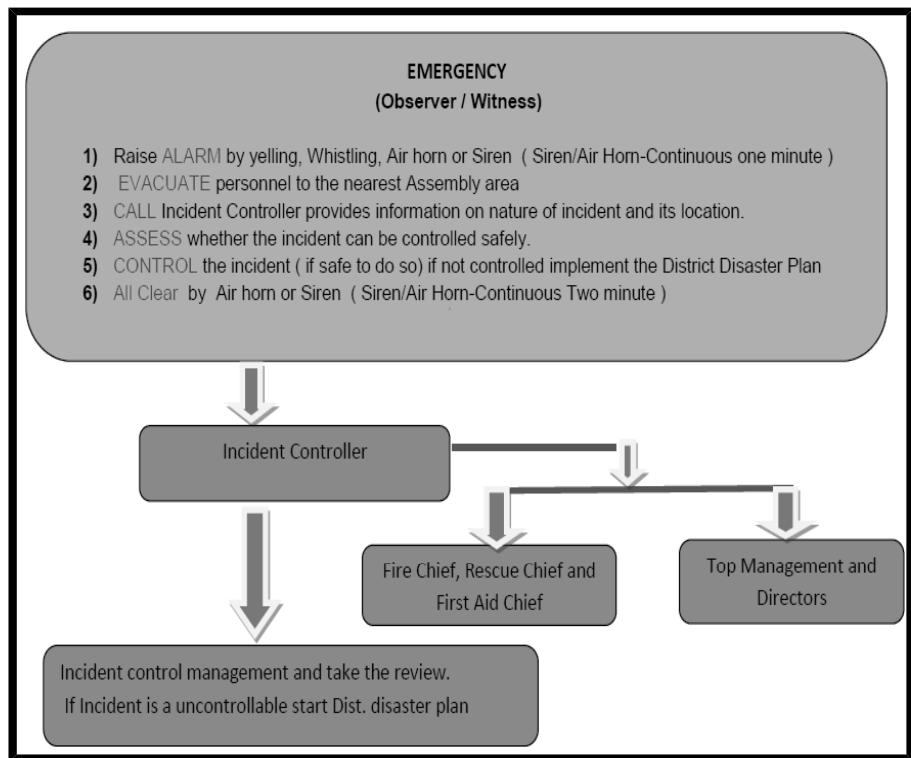

- If possible, maintenance or establishment of a vegetated buffer zone is considered as best practice;
- Regular maintenance of equipment (lubrication); - Appropriate noise abatement accessories (silencers, mufflers, acoustic linings, shields) shall be put in place;
- Noisy stationary equipment like generators and compressors shall be provided with acoustic enclosures to reduce noise levels.
- topographic features to provide shielding;
- Periods when the environment is least sensitive (Eg during normal working days in a residential area) shall be selected for noisy activities; it is recommended to systematically avoid noisy activities at night time;
- A schedule of noisy activities (eg use of pile drivers, jack hammers, rock drills or for blasting activities) shall be drawn up when construction takes place in close proximity of particularly sensitive environments including schools, hospitals, residential area, sensitive ecosystems.

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

Emergency Response Plan

The Emergency Response plan is necessary as a moral and legal obligation of management to protect the safety people, property and environment. The objective of this "Emergency Response Plan" is to provide the organizational guidelines and directions to ensure fast and effective response in any emergency situation in order to save life, property and environment. At any time, it may be necessary to minimize harm to personal, the environment and business operations. Please remember that saving life and property is only possible if the emergency response procedure is effectively followed. This plan shall be followed in all cases of emergency. Therefore, it is imperative that every employee must be familiar and knowledgeable of what to do in case of emergency.

We have formed our Emergency Response Team in each Base Camp to combat with the Emergency situations. The Flowchart and the Team Details are displayed in the following pages:

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

Incident Controller
(Mr.Neelmani Katdare | Project Manager)
Mob. No: 09015469107

| | | |
|---|--|---|
| Fire Fighting Team Leader Mr. Sudip Sharma Mob. No: .09108369135 | Rescue Team Leader Mr..Shivakumar Reddy Mob. No.:9481076779 | First Aid Team Leader Mr. .Kiran Reddy Mob. No.:9448653655 |
| Mr. Partha Saradhi | Mr. K.Ramchandra Reddy | Mr. Narayana .P |
| Mr. Nannan Chinna | Mr. B. Janardhana Rao | Mr. P. Anil Kumar |
| Mr. B. Penchal Reddy | Mr. UMA Shekar Reddy | Mr. Ravi Kumar |

Emergency response plans will be developed specifically for the project that will cover:

- Fire
- General medical / first aid
- Major accident event
- Crane collapse

The following key roles will be assigned with identified responsibilities:

- First Aiders
- Emergency Rescue Personnel's

The following key facilities will be provided:

- Alarm systems
- Lighting Equipment
- First aid Kit
- Communication equipment

PROJECT NAME : Engineering, Procurement and Construction of Rehabilitation and Upgrading to 2 lanes / 2 lane with paved shoulders configuration and strengthening of Madhugiri-Mulbagal Road Section (Km 343.800 to Km 483.151) of NH-234 in the State of Karnataka (Package No. NHIIP-KA-234-10) for Lot-II Km 400.330 to Km 483.151" under Phase-I of National Highways Inter-connectivity Improvement Projects (NHIIP)

EMP Reporting Formats And Frequency

| Sr.No | Format Number | Details of Formats | Frequency of Reporting |
|-------|----------------------|---------------------------------------|------------------------|
| 1 | MMRP/NH234/EMP/FR/01 | Statutory summary | Quarterly |
| 2 | MMRP/NH234/EMP/FR/02 | Construction Camp Establishment | Six Month |
| 3 | MMRP/NH234/EMP/FR/03 | Soil Management | Quarterly |
| 4 | MMRP/NH234/EMP/FR/04 | Earth Barrow Area Management | Quarterly |
| 5 | MMRP/NH234/EMP/FR/05 | Stone Quarry Management | Quarterly |
| 6 | MMRP/NH234/EMP/FR/06 | Scarified Bitumen Storage Sites | Every Month |
| 7 | MMRP/NH234/EMP/FR/07 | Accident Data | Every Month |
| 8 | MMRP/NH234/EMP/FR/08 | Consolidated Environmental Compliance | Every Month |
